Workflows Lab - Publishing an Open Textbook

Courtney Tkacz

Contents

Welcome to my first open textbook!

Chapter 1

Introduction

This open textbook will describe how to publish an open textbook using GitHub Pages.

Chapter 2

First Steps

Instead of starting from scratch, find an open textbook repo to fork. If you want to use Bookdown to render your open textbook, find a repo that includes a GitHub Actions script to perform that work.

Chapter 3

Adding Content

To add chapters to your textbook, simply create new files for each one. Book-down supports Markdown formatting. You can also insert graphics, including images, charts, and figures.

Here is an example:

```
par(mar = c(4, 4, 0.1, 0.1))
plot(pressure, pch = 19, type = "b")
```

Chapter 4

Conclusion

I hope you enjoyed this tutorial about how to publish an open textbook using GitHub Pages!
